

SEEING BEYOND.

RESEARCH FOR A LIFE WITHOUT CANCER

INTERNATIONAL PHD PROGRAM

PHD POSITIONS IN CANCER RESEARCH

Are you looking for excellent research opportunities for your PhD studies at the forefront of basic, epidemiological or translational cancer research? At the **German Cancer Research Center (DKFZ)** in Heidelberg, Germany's largest biomedical research institute, more than 500 PhD students unravel the causes of cancer development and develop novel tools for diagnosis, treatment and prevention.

PhD students are supported by a Thesis Advisory Committee, participate in scientific and professional skills courses, attend international conferences and receive career development support. The language of the PhD program is English. Full funding is provided for the duration of the PhD, either by the DKFZ, third party sources or in collaboration with the DAAD within their Graduate School Scholarship Program.

The DKFZ offers PhD projects in diverse and interdisciplinary cancer research topics:

- [Cell Biology and Tumor Biology](#)
- [Functional and Structural Genomics](#)
- [Cancer Risk Factors and Prevention](#)
- [Tumor Immunology](#)
- [Imaging and Radiooncology](#)
- [Infection, Inflammation and Cancer](#)
- [Translational Cancer Research](#)

For more information and to apply online visit
www.dkfz.de/phd

Applications are invited from international students holding the equivalent of a university Master's degree in the natural sciences. Research experience and excellent English skills are a prerequisite.

Application deadline
5th January 2017
