

## Internship Programme 2023

**Johnson Matthey**  
Inspiring science, enhancing life

Johnson Matthey is pleased to announce its Internship Program - 2023.

Through the program, students will be able to apply for full-time summer internship within one of the biggest departments of the company - Lab department, an integral part of the Quality function.

Students will have opportunity to broaden their knowledge working on state-of-the-art equipment and practicing the highest international standards for laboratory work. Theory and practical training plan for each intern will be selected and supported by our mentors. The Summer Internship Program provides a unique opportunity to gain valuable professional experience and build skills necessary for career start up.

Students from the **Faculty of Pharmacy, University Ss. Cyril and Methodius, Skopje** are eligible to apply.

The candidates for the internship programme should fulfil the following qualification criteria:

- To be a university student in II/III year of studies ;
- Knowledge of English language;
- Computer knowledge – MS Office package, Internet, e-mail
- Good organizational skills;
- Team player with good interpersonal skills;
- Good communication skills (written and oral);
- Self-initiative and proactive toward the work and given tasks;

If you are interested in an internship, please send your CV in English on the following e-mail address:
